E-Commerce Sales & Order Management System

SQL Project – Output Report

PostgreSQL / pgAdmin 4 | Key query outputs from the completed project

1. Database Verification

Table	Record Count
Customers	10
Products	10
Orders	11 (includes trigger test order)
Order Items	12 (includes trigger test item)
Payments	10
Shipping	10
Reviews	8
Returns	3

2. Customer Order Analysis

Customer	Orders
Rahul Patil	2
Sneha Sharma	1
Amit Pawar	1
Priya Deshmukh	1
Akash More	1
Neha Joshi	1
Rohit Kulkarni	1
Pooja Shah	1
Suresh More	1
Kiran Jadhav	1

3. Category Revenue Analysis (business orders)

Category	Orders	Units Sold	Revenue (■)
Electronics	3	3	200,997.00
Clothing	1	3	3,097.00
Home & Kitchen	1	1	3,499.00
Books	2	3	1,897.00
Sports	1	1	2,999.00

Note: Order 11 was created only to test the stock trigger and is excluded from business-performance outputs.

4. Top Selling Products

Product	Units Sold	Sales (■)

iPhone 15	1	69,999.00
Samsung Galaxy S24	1	74,999.00
Dell Inspiron Laptop	1	55,999.00
Men T-Shirt	2	1,598.00
Mixer Grinder	1	3,499.00

5. Inventory / Stock Output

Product	Current Stock	Status
iPhone 15	23	In Stock
Samsung Galaxy S24	20	In Stock
Dell Inspiron Laptop	15	Low Stock
Men T-Shirt	50	In Stock
Women Jeans	35	In Stock
Mixer Grinder	18	Low Stock
The Alchemist	40	In Stock
Python Programming Book	30	In Stock
Running Shoes	25	In Stock
Yoga Mat	45	In Stock

6. Payment Method Analysis

Payment Method	Paid Orders	Paid Amount (■)
Credit Card	2	77,998.00
UPI	4	72,996.00
Debit Card	1	55,999.00

7. Order Status Output (initial business orders)

Status	Orders
Delivered	5
Shipped	2
Pending	2
Cancelled	1

8. Key SQL Features Demonstrated

Feature	Purpose
JOIN / LEFT JOIN	Combine customer, order, product, payment and shipping data
GROUP BY / HAVING	Business summaries and repeat-customer analysis
CTE	Break complex analytics into readable steps
Window Functions	Ranking and month-over-month analysis
VIEW	Reusable sales and dashboard reports
Stored Function	Reusable customer reporting logic
TRIGGER	Automatically reduce product stock after order-item insertion
CASE	Customer, stock and revenue segmentation

Important: The PDF is a project-output summary, not a screenshot export from pgAdmin. The values reflect the project data and the completed SQL logic, with the trigger-test order excluded from business KPIs.
